KOBE STEEL IMPROPER TEST REPORT FALSIFICATION & SUSPECT MATERIAL

Dear C&K Customers,

Quality is of the utmost importance to C&K. As you may be aware, Kobe Steel has admitted to falsifying product test reports and for this reason we immediately investigated the risk to C&K for using some of the materials impacted by this falsification.

We have conducted due diligence throughout our whole supply chain. We have now received all the answers from all our suppliers and none of them has identified any suspicious material in the products delivered to C&K. As a consequence, we can confirm from our side that no product delivered by C&K is impacted by this falsification

We remain at your full disposal if you have any question regarding this subject.

Best regards

Jerome BROCHOT
Global Quality Director
C&K
