

SWITCH SOLUTIONS FOR TRANSPORTATION

There are few industries both as diverse and complex as transportation. From the heavy equipment used to build our cities and maintain our infrastructure, to the airplanes we board to travel to the latest vacation destination and the personal off-road vehicles we use for play – they all need a variety of switches and solutions in order to work properly.

One of the common denominators throughout the entire industry is that the switches, buttons and levers that power the vehicles simply need to work. Every single time. That's where C&K comes in.

C&K's wide-ranging switch portfolio, along with our unmatched custom design capabilities makes sure you have the right reliable switch for the job.

Keyswitch		Rocker		Navigation	Detect

TRANSPORTATION APPLICATIONS

Application

- Multi-function grip/joystick buttons
- Cab/cabin switches
- Lift platform and hand control functions
- Instrument panel and overhead controls
- Remote controls
- Instrument panels (outdoor exposure)
- Seat belt latch verification & occupancy detection
- Motion limit sensing
- Panel closure detection

C&K switch options

Pushbutton (AP, APB, NP, PNP)
Keyswitch (K12, K12S)

Pushbutton (APB, PS, PVA)
Keyswitch (K12)
Tactile (KSC, KSA)

Pushbutton (AP, NP, PNP)
Keyswitch (K12, K12C)
Toggle (PT)

Pushbutton (APB, PBA)
Rocker, Keyswitch (ED)
Tactile (KSC, KSA)

Keyswitch (K12, K12C)
Rocker (CL, CN)
Toggle (PT)

Pushbutton (AP, NP, PNP)
Toggle (PT)

Snap (ZMS, ZMW, LCS)

Snap (ZMS, ZMW, LCS)

Snap (ZMS, LCS)

C&K offers a wide range of additional customized options including decoration, lighting, connections and sealing to IP68+ levels. Our customization expertise in bending, forming, shaping and plating metals can redefine the conditioned response customers derive from the interaction with your product.

Contact C&K to learn how we can help you with your next design challenge.
C&K - Trusted Brand in Switch Design with a focus on Innovation and Quality
